

Water Resistant Economy Polyester Fabric

Our lightweight polyester fabric works extremely well with both dye and UV inks. This product is our low cost leader and works great for most indoor applications. It has a superb coating for medium to heavy ink load without bleeding and is bright white which gives you a great color gamut. It is strong enough to hang outside with grommet support.

Advantages

- Dry to the touch immediately after printing
- Universally compatible, dye and pigment inks
- Waterfast without lamination
- Excellent control of "dot gain" for high resolutions
- High gamut, brilliant color saturation

Thickness	7 mil
Opacity	Greater than 93%
Whiteness	95%
Water Fastness	When printed with pigment and dye base inks
Light Fastness	When printed with pigment inks
Storage Recommendations	Store in room temperature between 50-90 °F
Shelf Life	One Year from date of Manufacture
Handling	Material should be handled with gloves to prevent finger marks on media

Product Codes:	QM-ECF-36	36" X 150'
	QM-ECF-50	50" X 150'
	QM-ECF-60	60" X 150'
